FREE COINAGE.

We demand the free and unlimited coinage of both silver and gold at the present legal ratio of 16 to 1, without waiting for the aid or consent of any other nation. We demand that the standard silver dollar shall be a full legal tender, equally with gold, for all debts, public and private, and we favor such legislation as will prevent for the future the demonetization of any kind of legal tender money by private contract.

We are opposed to the policy and practice of surrendering to the holders of the obligations, of the United States, the option reserved by law to

We denounce as distribing to business the Republican treat to restore the McKinley law, which has twice been condemned by its people in na-tional elections, and which, enacted under the false plea of protection to home industry, proed a prolific breeder of trusts and nonopolies, enriched the few by the expense of the many, restricted track and deprived the producers of the great American staples of access to ther natural mar-

INCOME TAX. Until the money question is settled we are opposed to aly agitation for further changes in our tariff laws, except such as are necessary to meet the deficit in revenue caused by the adverse decision of the sipreme court on the income tax. But fir this decision the supreme court there would be deficit in the revenue under the law ssed by a Democritic congress in strict pursuance of the uniform decisions of that court for 100 years, that court having in that decision sus-tained constitutional objections to its enactment which had preciously been overruled by the ablest judges who clare that it is the duty of congress to useall the constitutional power which remains after that decision, or which may come from its reversal by the court as it may hereafter be constituted, so that the burdens of taxation may be equally and impartially laid, to the end that wealth may bear its due proportion of the expense of the government.

We hold that the most efficient way of protecting American labor is to prevent the importation of foreign pauper labor to compete with it in the home market, and that the value of the home market to our American farmers and artisans is greatly reduced by a vicious monetary system which depresses the prices of their products below the cost of production, and thus deprives them of the means of purchasing the products of our home manufactories, and, as labor creates the wealth of the country, we demand the passage of such laws as may be necessary to protect it in all its rights.

We are in favor of the arbitration of differences between employers en gaged in interstare commerce and heir employes, and recommend such egislation as is necessary to carry out this principle.
